WHO ARE THE ACTORS WE TRULY ADMIRE?

Whether it is Daniel Day Lewis or Cate Blanchett, it is their power to transform that impresses us. It is their ability to be different people – to play a wide range of roles from opposite ends of the spectrum of human experience.

Acting Power introduces you to unique and innovative processes that can significantly increase the range, depth and understanding of your work as an actor.

The experiential processes used on the course have been developed from the best acting techniques and methods that the world has to offer.

You will discover aspects of yourself that you have not accessed before and insights

that will empower and enrich your professional and personal life.

Are you ready to challenge your assumptions about your own potential and capabilities as an actor?

Whether you are already working successfully in the industry or you are just starting out, this course could revolutionise your approach to acting and increase your chance of being considered for a wider range of roles.

The course will include text work, improvisation, screen acting and preparation for auditions.
